

## ABOUT US

---

### MIXMANIA RECORDS

Based in London and Dorset, Mixmania Records is an independent record label. We specialize in exciting and innovative Deep House, House, Tech House and Techno music. Our philosophy is deeply rooted in discovering, refining and promoting new talent. Talent, which begs to be recognized; talent, which can break down linguistic and cultural barriers; talent that has the power to be recognised on dance floors all around the world. From humble beginnings we have grown into a leading pioneer of the British electronic music scene. Our own expertise has allowed us to cultivate an array of unique artists from all over the globe and help develop their skills and knowledge to become world-class DJs and producers.

We understand just how difficult it is for artists to get ahead in today's over-saturated music industry. That's why we at Mixmania Records believe it is key to give unique artists a platform to launch or further their careers. We are always on the lookout for fresh music no matter where it comes from, whether that be from an established artist or an up-and-coming star. We are willing to help develop our artists and make sure their music gets the attention it deserves. This is our key philosophy. We don't focus on the glamour and drama of the industry; we focus on the fine-tuning and development of talented artists and their music. This is what differentiates Mixmania Records from other labels. We strive for musical talent, not artificial flair.

Our expertise in the genres of Deep House, House, Tech House and Techno have provided us with the tools to help emerging and established artists reach their goals. If you are an electronic music producer who believes in our philosophy, please send us a demo! We regularly release new music and updates on our artists so please watch this space.
